EASY TINKERTOY Because of low price and exceptional value this item is good for continuous year around sale. Children of kindergarten age and older can make all of the action and still models shown on the comprehensive direction sheet, and from these learn how to build others of their own creating. The parts are standard with similar pieces in all Tinkertoy sets, and the designs and models are based on the same mathematical principle. Rods, spools and other wood parts are made of smoothly turned New England white birch, natural finish. 38 wood parts, 4 windblades and 1 direction sheet showing over 45 models.

Packed in a 2½" x 8" fiber container with metal top and bottom. Shipped 2 and 4 dozen to case. Weight per dozen, 5½ pounds.

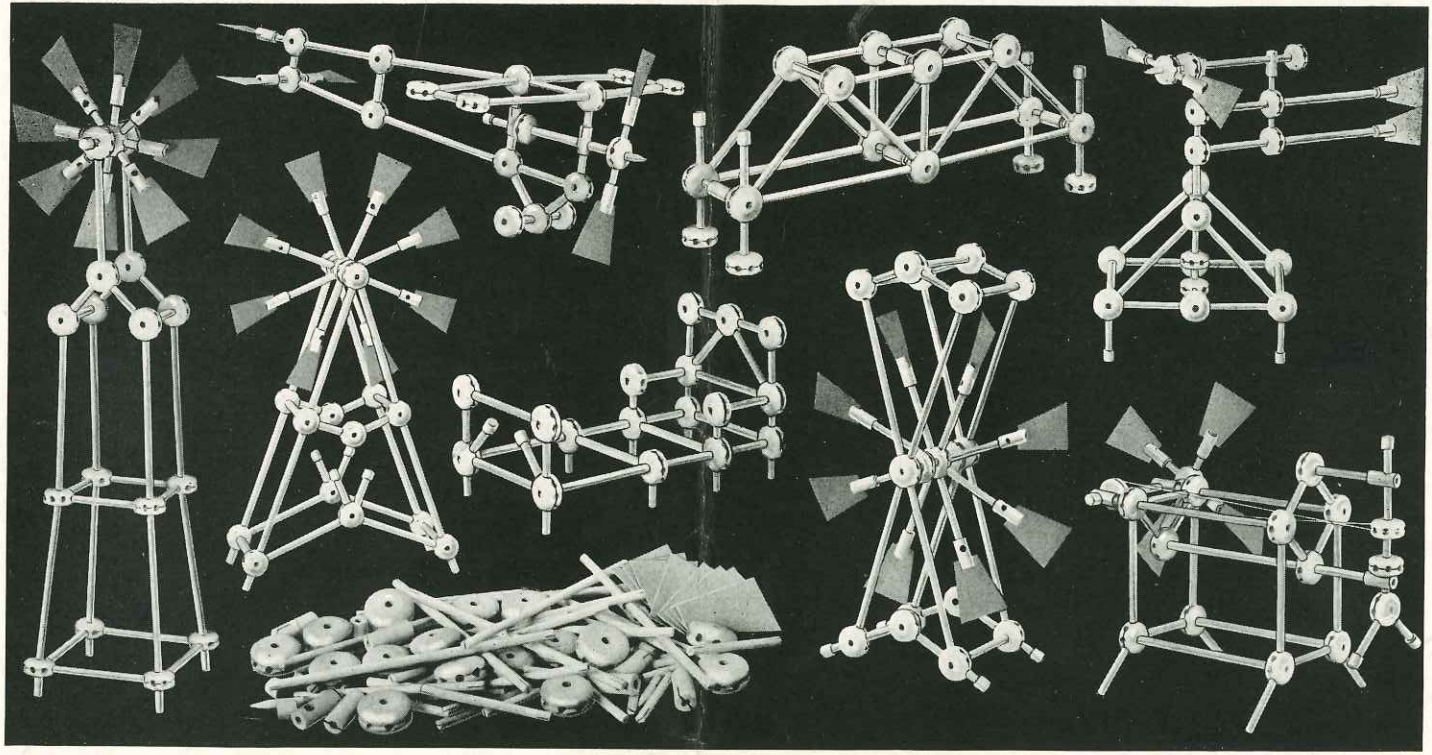
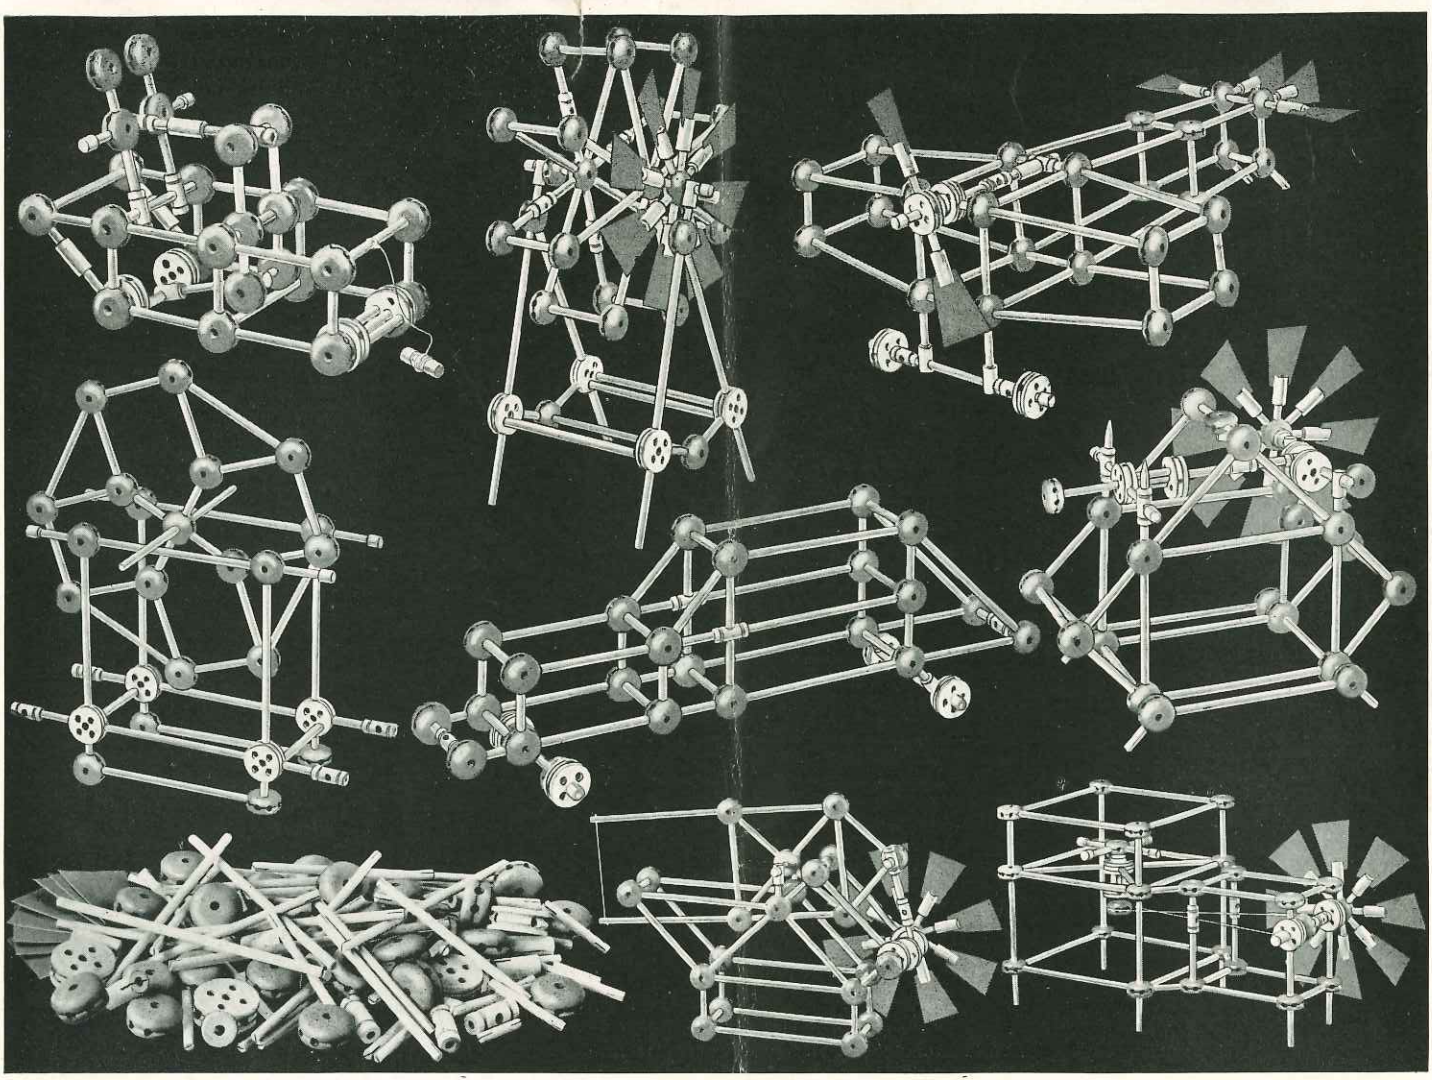
p. 1



JUNIOR TINKERTOY Next in the low price field, Junior Tinkertoy has approximately double the number of parts contained in Easy Tinkertoy, providing means for making larger models in a wider range of design and motion. These are still in the class of simplicity, and are easy to construct. Junior Tinkertoy meets the requirements of those looking toward economy. Smoothly turned New England white birch, natural finish. 73 wood parts, 8 windblades, 1 direction sheet showing over 38 models and a trick sheet showing stunts and games in which the various pieces are used.

Packed in a 3" x 9½" fiber container with metal top and bottom. Shipped 1 and 2 dozen to case. Weight per dozen, 11 pounds.

p. 2



WONDER BUILDER TINKERTOY The improved "ORIGINAL" around which all other Tinkertoy sets have been created. 118 smoothly-turned New England white birch wood parts, natural finish, 8 windblades, 1 direction sheet and a trick sheet of stunts and games. Packed in a 3¾" x11" fiber container with metal top and bottom. Shipped 1 dozen to case. Weight per dozen, 18 pounds.

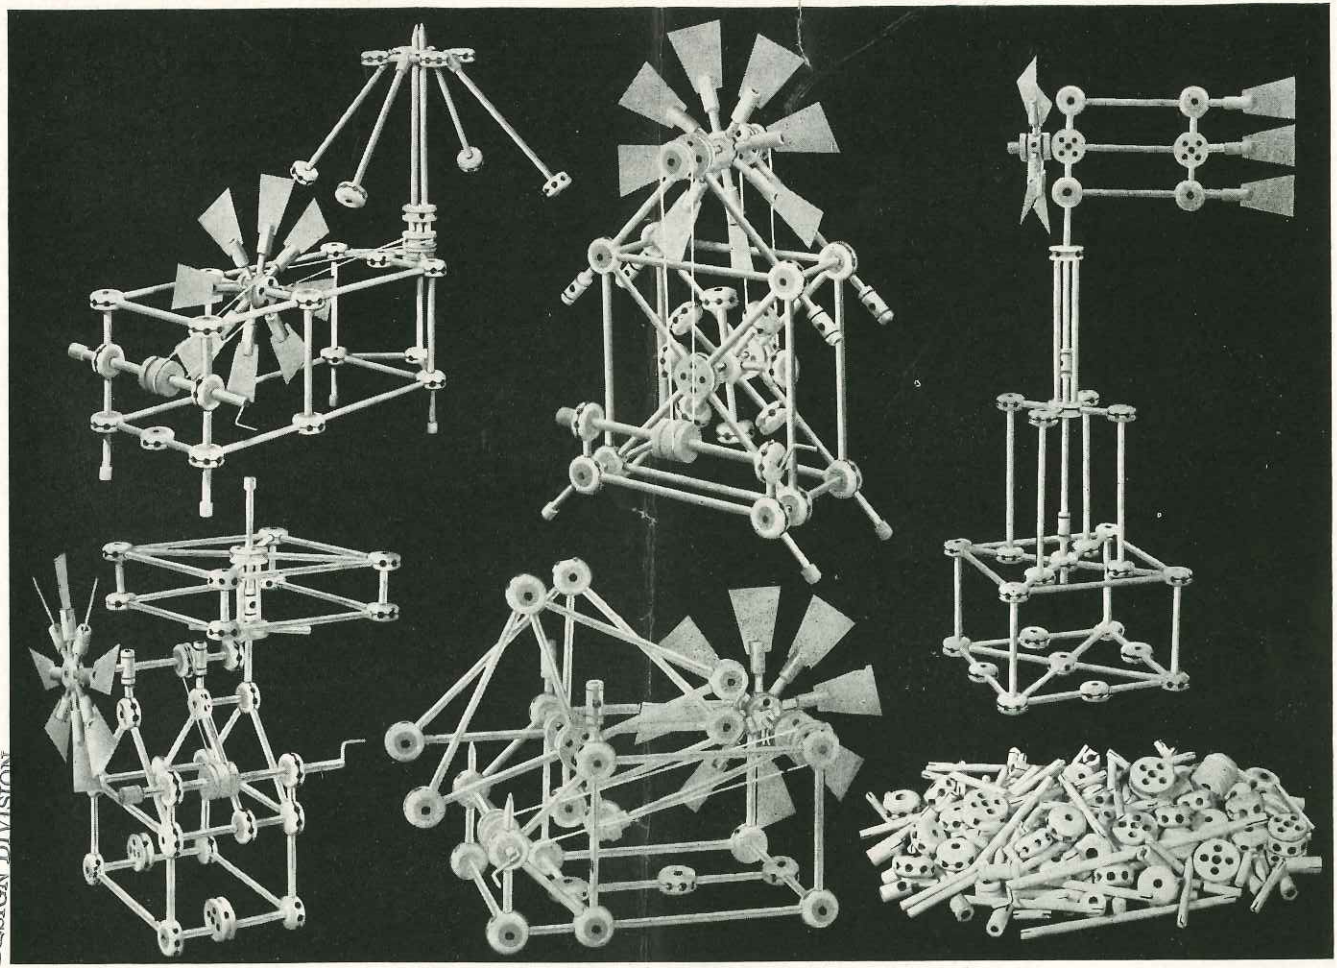
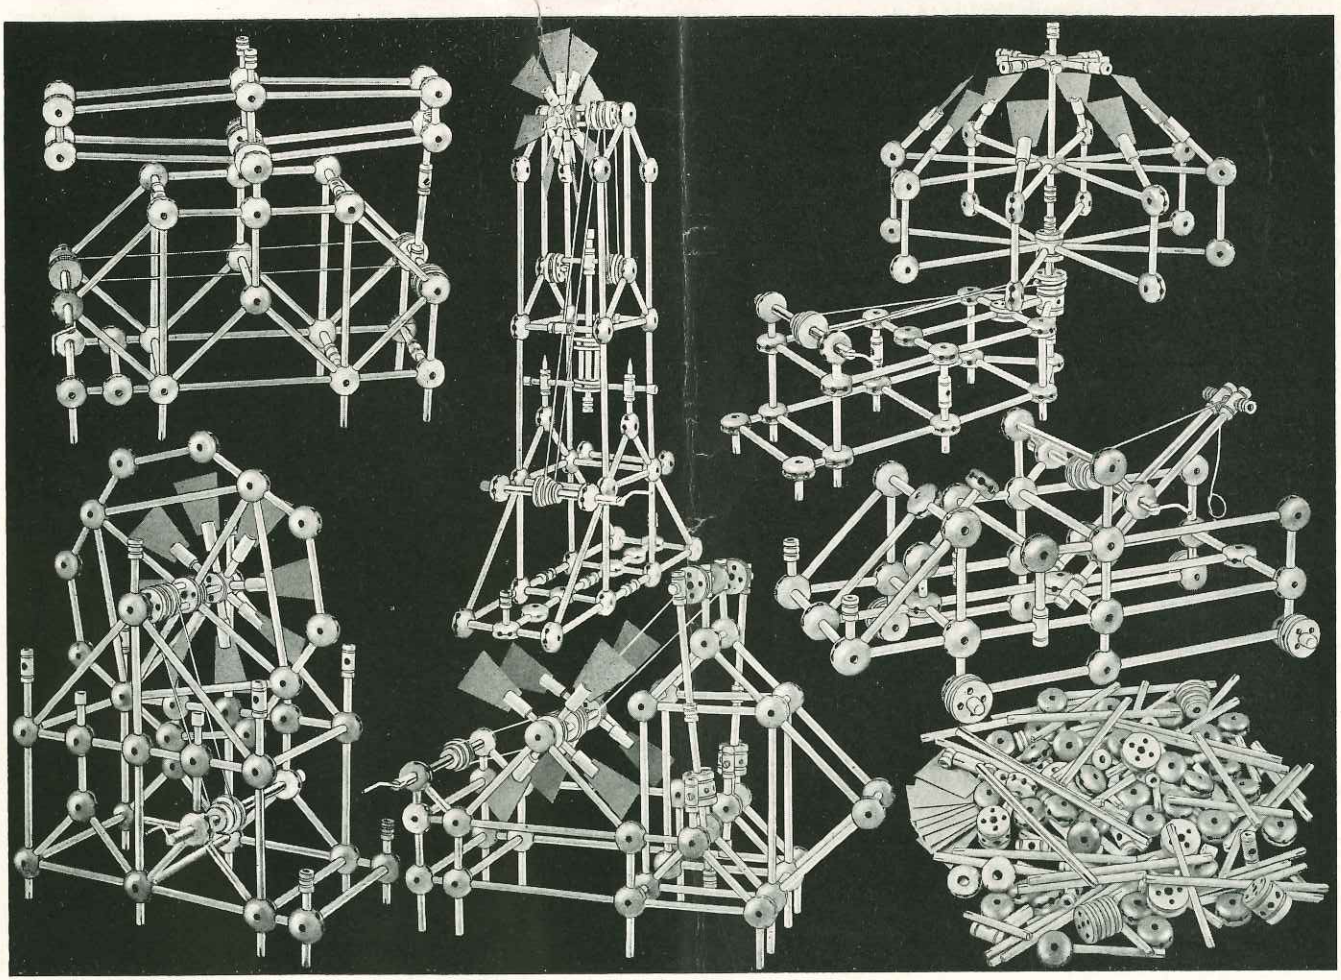
DESIGN DIVISION



SPECIAL TINKERTOY An elaboration of the Wonder Builder with more parts, varying designs and incorporating the Windlass Drive which supplies the power that gives action to each model by means of a hand crank, an important and desirable feature. 126 smoothly turned New England white birch wood parts, natural finish, 1 metal crank, 8 windblades, 1 direction sheet showing 36 models and a trick sheet of stunts and games using the various pieces. Packed in a 3¾" x 12½" fiber container with metal top and bottom. Shipped 1 dozen to case. Weight per dozen, 21 pounds.



SENIOR TINKERTOY The largest of the Tinkertoys. Special pieces and a greater number of standard parts enable the operator to construct elaborate moving and still models without limit. The Windlass Drive is also incorporated in this set. 178 smoothly turned wood parts, natural finish, 1 metal crank, 8 windblades, 1 sixteen-page direction book of models and a trick sheet of stunts and games using the various pieces. Packed in a 4" x 14" fiber container with metal top and bottom. Shipped 1 dozen to case. Weight per dozen, 28 pounds.

Easy No. 1—1½"
Same No. 2—1⅞"

CUT SERVICE

Advertising mats or type high electros are available to dealers at no charge. The following are on hand in sizes shown. Order by name and number. Larger sizes will be made on request.
